## BRITISH SHIP IN SHALLOW WATER

Life-Savers Hear Distress Signals and Board Steamer-Pilot Wanted.

TO TAKE TRIP IN AIR-SHIP

Dr. Thomas Arrives in Norfolk and Is Preparing for Sail

(Special to The Times-Dispatch.)

NORFOLK, VA./ February 2.—Lifesavers at the Cape Menry Station reported the British steamship Soutra. Captain Watt, bound from Liverpeoi to Norfolk to load coal for Demerara, ashore abreast of Cape Henry this morning. The life-savers say that when they bounded the ship she was just working of into deep water, and that the captain declined assistance. The ship blew distress signals, according to Captain Holmes, the keeper of the life-saving station, but Captain Watt claims that his was calling a pilot. The captain says that his vessel did not touch bottom, but was dangerously near the beach.

A dense fog hung over the water in the vicinity of Cape Henry when the Soutra came in.

Dr. Julian P. Thomas, of New York, famous aeronaut and air-wegonist, arrived in Norfolk from New York this morning, and this afternoon got his balloon ready for an ascension Monday at 11 o'clock. There will be no further postponement of the ascension, unless weather conditions Monday should make it imperative.

conditions Monoay snowld make it imper-ative.

The balloon will carry Dr. Thomas and five others in its basket from the gas house, on James Street, to the Exposition Grounds. It has not yet been definitely, determined just who will accompany the doctor, but there will be other aeronauts and an exposition official.

Dr. Thomas, should his plan mature, will be the next person to attempt to reach the North Pole, and he will use his nir-wagon to get there. It will be at least a novel way of trying for the pole, but the doctor thinks it will be a suc-cessful way.

# PARK NO LONGER TO

Joplin Women, Who Gave Place Its Name, Now Seek to Have

JOPLIN, MO., Feb. 2.-Acting upon the orated, while it was suggested that the park was near the Eugene Field School building, and it might be called the Eu-

gena Field Park.

It developed at the meeting that the name of "Lovers' Retreat" had become so obnoxious to the women of East Joglin that the park had become unpopular. The title, according to the residents who have been title, according to the residents who have been in the community for a score of years, originated when the young folks of East Joplin used to congregate there to hold hands, whiseer secrets and make love yows. Many a woman well known in East Joplin to-day used to wander down that way arm in arm with her sweetheart, whom she later married, and there with whom she later married, and there with other couples they told their happiness to

# PURITY PURPOSE

E GREET with hearty approval the Pure Food and Drugs Act which was passed by Con-gress on June 30, 1906, and went into effect January 1, 1907. The people of America are entitled to protection of their health against adulteration and misrepre-

sentation of their food, drink and medicine, and the new law will go a long stride in the direction of accomplishing this purpose.

The REGULATION AND CONTROL of such objectionable and perilous conditions has been demanded for many years by the American people, until their insistence compelled the respect of their representatives in the National Legislature, and produced the Pure Food and Drugs Act, so long a step in the right directions. The victory was of and by the people, and the nation should glorify in the consciousness of it.

When, eleven years ago, it became our desire to furnish the American people with a mild, gentle, convenient laxative medicine for, the family, palatable but powerful, harmless but effective, we were actuated by a fundamental PURITY OF PURPOSE—to produce a perfect product, strictly pure, clean, of vegetable lagredients—easy to buy, easy to take and easy in action. In the form of a dainty, fragrant little tablet, in a neat and handy little enameled box fit for purse or vest-pocket, we produce the greatest medicine of the kind in the world, under the motto, from its inception to this day, of "PURITY." We had no guarantee that our preparation, now world-famous under the name Cascarets Candy Cathartic, would make so phenomenal a record, but we had the FAITH that with our bonest intention, our PURITY-PURPOSE, and our insistence upon perfection achieved by great scientists, the People would learn the TRUTH, would get the results, and bestow their favor on our efforts.

We have never found it necessary to change our methods, our formula or the form or quality of our product in those eleven years of its history. The sale of Cascarets, by the favor and appreciation of the American people, has achieved the phenomenal proportions of OVER A MILLION BOXES A MONTH,—12,000.000 IN THE YEAR. This is the greatest demonstration of the success of an article created by a Purity-Purpose, that has been recorded.

The American people have recorded their MERIT-VERDICT about CASCA-RETS CANDY CATHARTIC. They have found that this little tablet has ever accomplished what was promised for it,—that it was the purest, mildest, most thrustworthy medicine FOR THE BOWELS, and with faithful use would accomplish the relief of many ailments arising from disturbances in the alimentary canal. We feel that the great CONFIDENCE of the American People has been deserved, and yet we feel grateful to them for this REMARKABLE DEMONSTRATION and wish to express the HOPE that we will continue to enjoy the confidence of the American Home hereafter as heretofore.

If you have never tried Cascarets, buy a little 10c box TO-DAY, and be sure you GET WHAT YOU ASK FOR—the only GENUINE. All druggists 10c, 25c, 50c.

glamour of romance added its charm. But the young folks who used to make the place their rendezvous have grown up and the glory of the name has departed.

NEW YORK, Feb. 2.—The run on the Mechanics Trust Company of Bayonne, N. J., which was started yesterday by a false runor regarding the institution's solvency, continued to-day. There were none of the scenes which marked the early stages of the run, however, where hundreds stood in line yesterday waiting to withdraw their savings, there were only seventy-five on hand when business was resumed to-day. resumed to-day.
Officials of the trust company announced

#### TAFT, THE TOURIST.

Will Visit Panama and Then the Philippines.

WASHINGTON, Feb. 2.—Plans for Secretary Taft's visit to Panama in March have not been definitely formulated as yet, but he probably will go late in the month, and will be accompanied by several army engineers. This visit to the Philippines will probably be made in August and September. He is going for the purpose of being present at the opening of the Philippine assembly, and will be accompanied by Mrs. Taft, but will not have a large party with him on this trip.

Our Indian Battlefields.

Editor of The Times-Dispatch: Dear Sir,-I write to suggest that at this time it would be especially appro-priate to mark the spots which lie within our city limits upon which were fought in 1670 the last two battles with the Indians in this State. The colonists were under the leadership of the intretic liam Berkeley, who seems to have asanely jealous of Bacon and proclaimed

great offense to the Governor, Sir William Berkeley, who seems to have been Insanely jealous of Eacon and proclaimed him rebel.

The first of these engagements took place in the woods (in the western part of the present city limits, or near them, though the exact location is not findicated) and was a complete surprise and utter rout of the savages.

Bacon had visited his quarter on Bacon's Quarter Branch, near the new gas tank, on Moore Street, and found the bodies of his men, who had been surprised and murdered by the Indians but a short time before. He returned home, near Jamestown, and raised a body of 400 men, and tried in vain to obtain the consent and commission of the Governor to march against the savages. He set out without them with the enthusiastic approval of his men, who doubtless felt that it was necessary for the preservation of heier families to deal promptly and sternly with them. He was soon upon the spot where his men had been murdered, and they began the hunt for the Indians. They were soon found, and were surprised around their fires and nearly all killed. A few escaped. Prisoners were considered cumbersome in those days. This occurred near where the Soldiers' Home now stands, though the exact spot is not known. The savages gathered a formidable force soon after the gallant Bacon and fils stalwart men marched east and fortified themselves in a strong stockade about the corner of Thirtieth and Broad Streets, on the edge of a deep ravine with almost precipitous sides. Bacon soon learned of their position and marched to attack them without delay. Here the fighting was severe and bloody, and as the Indians were fortified and their works had to be stormed, the whites suffered heavy losses in tilled and wounded before they were dislodged. The ravine above alluded to was the scene of desperate fighting, and tradition stafes that blood stained the little stream that trickled through its bottom. Hence this place has borne the name of the "Bloody Run" ever since. This ravine is now almost completely f

Railroad tunnel.

It does seem to me, Mr. Editor, that
these, two spots ought to be marked in
order to be shown to visitors to the
Iamestown Tercentennial, as well as to others afterwards, and to preserve them to our own people as the spots upon which the last organized battles took place between the savages and the colonists in Virginia.

from the meeting Friday night.

Between thirteen and fourteen were initiated. The gentlemen invited to speak were detained elsewhere, but Mr. Joseph Portch, of the Bookbinders' and Mr. Sidney Cates, of the Typographical Union, were present and, spoke briefly to the women of the union, and urged them to advocate the labor temple when it came up for sanction.

The new members initiated were the most attentive to the indiresses delivered, and it is evident that the factory contingent will assist in the building of the labor temple, and also be numbered among the most ardent adherents of the establishment of such an institution. Both speeches were complimentary to the organization of the women.

President Short responded, and releated the statement of the preceding speakers, and the union of women resolved to stand solidly for the temple proposed.

## Authoritative Spring Suit Models Are Here.

The window will give you the first fascinating glimpse of them. Our second floor holds the real exhibition. It was our good fortune this year to secure these cleverly designed Suits weeks earlier than usual. Many women, anxious to see and purchase "correct spring styles." were quick to appreciate that the prices asked for them are decidedly lower than such perfect suit models are generally sold for. To this fact we owe our unparalleled early spring suit business, which more than doubles any previous year in our history.

#### THE FARMER AND PROSPERITY

#### ROBERT FRAZER

The press is teeming with accounts of flush times and with general statements, soing to show that all classes and all crafts are on a tidal wave of unparalled prosperity. Now and then a discordant note comes from the country like that, for example, which appeared some days ago in The Times-Dispatch from a New Kent farmer. The writer is unmistakably intelligent, and he writes as one who knows his ground. He gives facts which show conclusively that farmers, so far as he knows them, are not having good times. So this question, as is true of most questions, has two sides. Wonder if we can get at the real state of the case reflects urban sentiment. Now, there are two sources from which the towns man mainity derives his impression of tirst prosperity.

1. The townsman reads of frequent land sales at greatly advanced prices, so add also true that prices are much more frequent now than they were a while ago, and also true that prices are much higher. But farmes that flund sales are much more frequent now than they were a while ago, and also true that prices are much higher. But farms that flund ready sale are, in large part, such as offer the capitallst some special attraction, as valuable timber or a handsome residence or a Colonial home, or some other feature quite apart from the refarred put apart from the graph and the conclusion than seldes, a farm of this sort is not infrequently sold several times in a few months, and each time at a considerable advance. And so there goes out an exaggerated impression of the volume of rade in lands.

11 also remains true that the ratio of farms selling to farms for sale is exceedingly small, and that in many parts of Virginia five times as much and considerable advance times as much and considerable advance that the ratio of farms selling to farms for sale is exceedingly small, and that in many parts of Virginia five times as much and considerable advance that the ratio of farms selling to farms for sale is exceedingly small, and that in many parts of Virginia five times as much press is teeming with accounts sh times and with general states, going to show that all classes all crafts are on a tidal wave of alleled prosperity. Now and then ordant note comes from the counter that for example, which and some days ago in The Timestech from a New Kent farmer. The r is unmistakably intolligent, and

parts of Virginia five times as much land can be sold at \$25 an acre's flut, average can be sold at \$25 an acre's flut, average if every farm in the State could for two could in the State could for the soll less would still find it to their advantage to hold on to their land. We must not forget that the real value of land to the tiller of the soll less not in what it will bring if put upon the market but in whats it will yield in corn, wheat, cattle or other products if well farmed.

2. Again, the townsman's notion of farm prefits is based largely upon what he has to pay for the farm products he consumes—beef, milk, butter, eggs, chickens and the like. The invalidity of a conclusion reached in this way will readily appear to one who takes account of the yavaning chasm between what the consumer pays and what the farmer gets—a chasm filled by enormous profits to iniddlemen.

I live in the city, and I buy these farmer gets—a chasm filled by enormous profits to iniddlemen.
